

Reducing The Cost of Preventative Pet Care

There is often a preconception that Vets bills are very expensive, even if a visit is required simply for a pets annual vaccination booster.

But why is that, is it because vets are actually very expensive, is it because we have free healthcare for humans and so have nothing to reference the cost of pet care against or is it because a trip to the vets always results in a lump sum needing to be paid in one go?

Most of us pay for the things we know we will need throughout the year in small monthly payments, things like insurance, utilities and taxes. So why not apply this to the cost of preventative care for your pet?

This is exactly what **Vet Savers** are now doing by offering clients the option to pay a set amount by direct debit every month, that covers the cost of their pet/s basic preventative care for a whole year with our **Healthy Paws Plan**.

So what is a years worth of preventative care? This will differ dependant on the species of your pet, however once your pet has had it's initial vaccination course the following is a guide to what your Vet will normally recommend for basic preventative care.

Cats

- Preventative flea treatment given monthly
- Worming treatment given every three months
- Vaccine booster against Flu, Enteritis and Leukaemia every year

Dogs

- Preventative flea treatment given monthly
- Worming treatment given every three months
- Vaccine booster against Distemper, Canine Hepatitis, Adenovirus, Parvovirus, Parainfluenza and Leptospirosis every year

Rabbits

- Worming treatment given every three months
- Vaccine booster against Viral Haemorrhagic Disease every 6 months
- Vaccine booster against Myxomatosis every year

Our Healthy Paws Plan pricing is reflective of the species and size of the breed of your pet and includes two health checks a year as well as a discount on the above treatments. As an added benefit all Healthy Paws

Plan members will received a 10% discount off all products (including Royal Canin food) and services provided directly by their practice.

So why not speak to one of our team at your local practice and see if we can help make you vets bills that little bit smaller.

Special Offers

● Pet MOT ●

We advise all cats & dogs over 5 years to have a Pet MOT to look for early warning signs of age related diseases - incs general health check, blood & urine test.

That's over £100 of tests for £27.50!!

Celebrating Vet Savers 20th Anniversary

**We are proud to be celebrating
the 20th Anniversary of
Vet Savers in October 2011!**

From one small animal Veterinary Surgery in 1991, VetSavers has thrived and now comprises of 11 VetSavers Veterinary practices serving companion animal owners across Buckinghamshire, Cambridgeshire, Essex, Lincolnshire, London and Northamptonshire.

We have our own pet insurance available from any of our practices or online at www.vetsavers4life.co.uk. We have also recently launched our Healthy Paws Plans which spreads the annual cost of a pets preventative care into twelve monthly payments paid by direct debit and also entitles all plan members to

A Big Thank You to Bayer HealthCare who have helped make this newsletter possible.

Bayer HealthCare

10% off products and services provided by VetSavers – please ask a member of staff for more details.

We are always looking for ways to improve the range of care and services available to our clients and their pets. We would like to thank you for making the last twenty years possible and we look forward to caring for your pet/s for many more years to come.

Renalzin for Cats

Renalzin is a non prescription product that your Vet may recommend as part of a treatment plan for kidney disease in cats.

Renalzin is a paste that can be added to dry or wet food and reduces the amount of phosphate that is absorbed, helping to protect the kidneys and slow the progression of the disease.
